Subject Index of Volume 10

Aluminium
  smell sensor using Al-doped Zn oxide thin film prepared by sputtering technique, 79

Biochemical oxygen demand
  measurement of *BOD* by initial rate of response of microbial sensor, 137
Biosensor(s)
  miniature glucose, with extended linearity, 37
  overall characterization of ISFET-based glucose, 41
  reaction-rate measurements by use of membraneless flow-through, 203

Catalytic activity
  effects of, of TiO_2-based specimens on their trimethylamine-sensing properties, 235
Cathode array
  auto-calibrated miniature microhole sensor system for measuring dissolved oxygen, 219
  mathematical model with finite-element analysis of recessed dissolved-oxygen, 223
Cation-selective electrodes
  performance of solid-membrane, for flow-injection potentiometry, 15
Carbon monoxide
  gas sensitivity of SnO_2 and ZnO thin-film resistive sensors to hydrocarbons, and hydrogen, 11
Chalcogenide glass sensors
  mechanism studies on Pb ion-selective, 55
Chemical analysis systems
  towards miniaturized electrophoresis and, on Si; alternative to chemical sensors, 107
Chemical sensing
  multiple-frequency SAW devices for, and materials characterization, 123
Chemical sensor(s)
  alternative to; towards miniaturized electrophoresis and chemical analysis systems on Si, 107
  based on SnO_2 and WO_3 for detection of formaldehyde; cooperative effects, 99
Clark oxygen electrode
  micromachined, 91
Conducting polymer films
  new kind of redox sensor based on, 31
Conductivity
  of polystyrene film upon exposure to nitrogen dioxide; novel NO_2 sensor, 149
Copper
  optically stimulated luminescence in Cu-doped Na chloride single crystal for high-quality X-ray imaging sensor, 197

Disasters
  algorithm for evaluating, by fuzzy reasoning, 143

Electric potential
  new equation for, of liquid and PVC membranes containing both neutral carriers and ion-exchangers, 47
Electrochemical measurement
  of SO_3–SO_2 in process gas streams, 161
Electrode(s)
  glass; new generation, 61
  micromachined Clark oxygen, 91
  performance of solid-membrane cation-selective, for flow-injection potentiometry, 15
  practical limits for solid-state reference, 169
  ultra micro glutamate sensor using platinized carbon-fiber electrode and integrated counter electrode, 179
Electrode properties
  ion-metal and ion-selective, compared on basis of polyelectrode model, 21
Electrolyte(s)
  combined measurement of surface potential and zeta potential at insulator/electrolyte interfaces, 67
  humidity effects on stability of solid polymer electrolyte oxygen sensor, 133
Electrophoresis
  towards miniaturized, and chemical analysis systems on Si; alternative to chemical sensors, 107

Flavour identification
  by odour-sensing systems using quartz-resonator sensor array and neutral-network pattern recognition, 85
Flow injection analysis
  reaction-rate measurements by use of membraneless flow-through biosensors, 203
Flow-injection potentiometry
  performance of solid-membrane cation-selective electrodes for, 15
Formaldehyde
  chemical sensors based on SnO_2 and WO_3 for detection of; cooperative effects, 99
Fuzzy reasoning
  algorithm for evaluating disasters by, 143

Gas sensitivity
  of SnO_2 and ZnO thin-film resistive sensors to hydrocarbons, carbon monoxide and hydrogen, 11
Gas streams
  electrochemical measurement of SO_3–SO_2 in process, 161
Glass electrodes
  new generation, 61
Glass sensors
  mechanism studies on Pb ion-selective chalcogenide, 55
Glucose biosensor
  miniature, with extended linearity, 37
  overall characterization of ISFET-based, 41
Glutamate sensor
  ultra micro, using platinized carbon-fiber electrode and integrated counter electrode, 179

Hydrocarbons
  gas sensitivity of SnO_2 and ZnO thin-film resistive sensors to, carbon monoxide and hydrogen, 11
Hydrogels
  design of conductometric pH microsensor based on reversibly swelling, 73

Hydrogen
gas sensitivity of SnO_2 and ZnO thin-film resistive sensors to hydrocarbons, carbon monoxide and, 11
influence of technological factors on hydrogen sensitivity of MOSFET sensors, 7
Humidity effects
on stability of solid polymer electrolyte oxygen sensor, 133

Immobilized enzymes
reaction-rate measurements by use of membraneless flow-through biosensors, 203
Immunosensor
performance of highly sensitive optical waveguide Mach–Zehnder interferometer,
Insulator
combined measurement of surface potential and zeta potential at insulator/electrolyte interfaces, 67
Interface(s)
combined measurement of surface potential and zeta potential at insulator/electrolyte, 67
Ion-exchangers
new equation for electric potential of liquid and PVC membranes containing both neutral carriers and, 47
Ion-selective electrode
ion-metal and, properties compared on basis of polyelectrode model, 21
ISFETs
analytical applications of pH-ISFETs, 1
overall characterization of ISFET-based glucose biosensor, 41

Lead
mechanism studies on Pb ion-selective chalcogenide glass sensors, 55
Luminescence
optically stimulated, in Cu-doped Na chloride single crystal for high-quality X-ray imaging sensor, 197

Mach–Zehnder interferometer
performance of highly sensitive optical waveguide, immunosensor, 209
Materials characterization
multiple-frequency SAW devices for chemical sensing and, 123
Mathematical model
with finite element analysis of recessed dissolved-oxygen cathode array, 223
Membranes
new equation for electric potential of liquid and PVC, containing both neutral carriers and ion-exchangers, 47
Metal additives
effects of, on trimethylamine-sensing properties of TiO_2 sensors, 229
Metal ions
thin-film polymeric sensors for detection and quantification of multivalent, 185
Microbial sensor
measurement of *BOD* by initial rate of response of, 137
Molecular sensing
using plasma polymer thin-film probes, 117
MOSFET sensors
influence of technological factors on hydrogen sensitivity of, 7

Neural network pattern recognition
perfume and flavour identification by odour-sensing systems using quartz-resonator sensor array and, 85
Neutral carriers
new equation for electric potential of liquid and PVC membranes containing both, and ion-exchangers, 47
Nitrogen dioxide
conductivity of polystyrene film upon exposure to NO_2; novel NO_2 sensor, 149

Odour-sensing systems
perfume and flavour identification by, using quartz-resonator sensor array and neural-network pattern recognition, 85
Optical fibers
pH sensor constructed with two types of; configuration and initial results, 155
Optical waveguide
performance of highly sensitive, Mach–Zehnder interferometer immunosensor, 209
Oxygen
auto-calibrated miniature microhole cathode array sensor system for measuring dissolved, 219
mathematical model with finite-element analysis of recessed dissolved-oxygen cathode array, 223
micromachined Clark oxygen electrode, 91
Sn oxide semiconductor sensor for oxygen determination in sub-ppm range, 191
Oxygen sensor
humidity effects on stability of solid polymer electrolyte, 133

Perfume identification
by odour-sensing systems using quartz-resonator sensor arrays and neural-network pattern recognition, 85
pH-ISFETs
analytical applications of, 1
pH microsensor
design of conductometric, based on reversibly swelling hydrogels, 73
pH sensor
constructed with two types of optical fibers; configuration and initial results, 155
Plasma polymer
thin-film probes, molecular sensing using, 117
Platinum
ultra micro glutamate sensor using platinized carbon-fiber electrode and integrated counter electrode, 179
Polymeric sensors
thin-film, for detection and quantification of multivalent metal ions, 185
Polystyrene film
conductivity of, upon exposure to nitrogen dioxide; novel NO_2 sensor, 149
Potential
combined measurement of surface and zeta, at insulator/electrolyte interfaces, 67

Quartz-resonator sensor array
perfume and flavour identification by odour-sensing systems using, and neural-network pattern recognition, 85

Reaction-rate measurements
by use of membraneless flow-through biosensors, 203
Redox sensor
new kind of, based on conducting polymer films, 31
Reference electrodes
practical limits for solid-state, 169

Silicon
towards miniaturized electrophoresis and chemical analysis systems on Si; alternative to chemical sensors, 107
Smell sensor
using Al-doped Zn oxide thin film prepared by sputtering technique, 79
Sodium chloride
optically stimulated luminescence in Cu-doped Na chloride single crystal for high-quality X-ray imaging sensor, 197
Sputtering technique
smell sensor using Al-doped Zn oxide thin film prepared by, 79
Stability
humidity effects on, of solid polymer electrolyte oxygen sensor, 133
Sulfur
electrochemical measurement of SO_3–SO_2 in process gas streams, 161
Surface acoustic wave devices
multiple-frequency SAW devices for chemical sensing and materials characterization, 123

Technological factors
influence of, on hydrogen sensitivity of MOSFET sensors, 7
Tin
chemical sensors based on SnO_2 and WO_3 for detection of formaldehyde; cooperative effects, 99
gas sensitivity of SnO_2 and ZnO thin-film resistive sensors to hydrocarbons, carbon monoxide and hydrogen, 11
Sn oxide semiconductor sensor for oxygen determination in sub-ppm range, 191
Titanium
trimethylamine-sensing mechanism of TiO_2-based sensors
effects of catalytic activity, 235
effects of metal additives, 229
Trimethylamine
TMA-sensing mechanism of TiO_2-based sensors
effects of catalytic activity, 235
effects of metal additives, 229
Tungsten
chemical sensors based on SnO_2 and WO_3 for detection of formaldehyde; cooperative effects, 99

X-ray imaging sensor
optically stimulated luminescence in Cu-doped Na chloride single crystal for high-quality, 197

Zinc
gas sensitivity of SnO_2 and ZnO thin-film resistive sensors to hydrocarbons, carbon monoxide and hydrogen, 11
smell sensor using Al-doped Zn oxide thin film prepared by sputtering technique, 79
